

PRODUCT OPERATION EXHIBIT

Thursday, 08 November 2012

Logicdata
Electronic & Software Entwicklungs GmbH
Wirtschaftspark 18
A-8530 Deutschlandsberg
Austria

To whom it may concern

We, **Logicdata Electronic & Software Entwicklungs GmbH**, ensure following:

Firmware changes can only be made by **Logicdata Electronic & Software Entwicklungs GmbH**, 3rd Parties will not have access to the Firmware.

Description:

The Firmware of the microcontroller is written in C-language.

The Firmware gets flashed in our Production and is write and read protected.

So it's not possible that any customer can change or adjust the Firmware.

Because of that it's not possible that third parties can make modifications to the transmitter to enable operation outside of the grant conditions.

Yours sincerely
